

Laboratory Technician (f/m/d) part-time

Join us at Mimi-Q, where we're revolutionizing the landscape of drug development through innovative drug repurposing strategies. Backed by pioneering research and a commitment to advancing healthcare, Mimi-Q has already made significant strides in the field, and now we're poised for rapid growth.

As part of our dynamic growth and product team, you'll play an important role in optimizing and driving the entire journey of drug repurposing, from discovery to market entry. Together, we'll navigate the stages of identification, validation, development, regulatory approval, and commercialization, reshaping the way pharmaceuticals are brought to market.

We are seeking a motivated **Laboratory Technician** to join our team at Mimi-Q. Your proficiency will include assays and analyses to simulate drug effects in the laboratory.

Tasks:

- Advanced trials mammalian cell culture techniques
- Proficiency in conducting experiments and analyses
- Responsible for cell growth and viability assays
- Responsible for the laboratory and improvement of processes
- Proficiency in conducting experiments and analyses
- Responsible for incoming goods inspection, storage and dispatch
- Analyze and improve innovative approaches in drug development

Your Profil:

- Completed education as laboratory technician or equivalent qualification and practical experience within a laboratory
- University degree in Biotechnology, Biochemistry or comparable studies
- Hands-on experience in cell culture techniques
- Ability to work independently as well as in a team
- Experience in handling pharmaceutical products and processes is an advantage
- Experience with 3D cell culture and co-culture techniques is a plus
- Proficient in using a PC and common MS Office applications
- Reliable way of working as well as initiative and assertiveness
- Willingness to collaborate with interdisciplinary teams
- Very good written and spoken English
- Knowledge of German is an advantage

Our Offer:

- Innovation drive company culture
- Personal development and professional training
- Short decision-making processes in a team-oriented atmosphere
- Opportunity to build a modern laboratory and company from scratch
- No work on Saturdays
- Weekly working hours 15 - 20
- We offer a fair salary depending on your experience

Small team, flat hierarchy and mission driven. The usual buzzwords here, except we actually mean them. We're small, lean, and we love what we're doing.

So, what do you think? Does this sound like you? Apply now! Send your documents including CV and relevant certificates to ben@mimi-q.com.
